You can find different types of ammunition, endurance and speed abilities when exploring the battleground with each class.. There are four vehicle classes: Hover, Tank, Copter and Artillery All 4 classes are deeply integrated into a team and squad cooperation system that is essential for gaining the victory.. If nobody plays tank you're going to lose etc Multiplayer works great even though it's a bit opaque, as there's no server list.

This is key to keeping a game interesting even when there's few people on, and I'm glad the developer has put this in.. You can do much worse for 5 bucks I'm giving this a thumbs up If the developer keeps adding interesting gameplay elements then he could easily up the price lateron too. But to be honest, I thought there was multiplayer matchmaking in this game I bought the game because i got a couponcode, and had hopes that it would be a fun little game.. There was no multiplayer and you can only invite your friends and play with them.. Just hit play and invite friends On the plus side, there's always someone to play against, as the game features automatic balancing with bots..
